- ducts (variable area), non newtonian flow, reynolds number (small), Bestman (A.R.), 8618
- acceleration waves, one dimensional waves, thermal effects, Franchi (F.), 9070
- constitutive equations, continuum mechanics, materials possessing memory, rheology, Murdoch (A.I.), 9505
- constitutive equations, non newtonian flow, stresses, stretching, Petrie IC.151 9906
- compressible flow, finite difference methods, fredholm equations, navier
- stokes equation, Taylor (C.), Morgan (K.), 9647 holes, recirculation, secondary flow, O'Brien (V.), 9602
- constitutive equations, polymers, shear flow, Erenberg (V.B.), Pokrovskii (V.N.), 10451
- constitutive equations, non newtonian flow, relaxing media, rheology, Larson
- dilute solutions, elongational flow, polymers, viscometry, Schummer (P.), Tebel (K.H.), 10454
- elongational flow, polymers, shear flow, Meissner (J.), Stephenson (S.E.), (et al.), 10455
- elongational flow, polymers, shear flow, Raible (T.), Stephenson (S.E.), (et al.), experimental methods, extensional flow, extrusion, nozzles, Ferguson (J.),
- Missaghi (K.), 10458 constitutive equations, creep, clongational flow, rheology, Missaghi (K.), Petrie
- (C.J.S.). 10459 dies, experimental results, extrusion, polymers, Macosko (C.W.), Ocansey (M.A.), (et al.), 10460

- closed conduit flow, dilute solutions, elongational flow, polymers, Oubrahim (A.), 10461

- boundary layer, duct flow, friction (skin), Durban (D.), Sitzer (M.R.), 10561 inequalities, plastic flow, variational methods, Sofones (M.), 11226 fourier transform, linear theory, reynolds number (small), spherical bodies, Volkov (V.S.i., 11525
- couette flow, flow reversal, moving surfaces, squeeze films, Avile (F.), Binding (D.M.). 11580
- duct flow, pressure gradient, transient effects, Randria (P.), Ly (D.P.), (et al.),
- couette flow, hydrodynamic stability, rotating cylinders, Zhang Kai, 11623 convection, heat addition, plane flow, rheology, Ganfulin (F.A.), Zapparov (F.I.), (et al.), 11710
- nvection, heat addition, thermohaline convection, Sharma (R.C.), Sharm (K.N.), 11720
- Viscoelastic materials, propagation, rods, semi infinite media, viscoelastic waves, waves, Singh (G.), Singh (A.), 124

 inclusions, inclusions, stress concentration, Lee (Y.S.), Smith (L.C.), 294

 constitutive equations, micromechanics, torsion, Wack (B.), 286

 reinforced concrete, structures, volterra equations, Rolle (B.), 546

 crystallography, deformation, micromechanisms, White (J.B.), 334

 conical bodies, inclusions, plane strain, rate sensitivity, Lee (Y.S.), Smith

- (L.C.), 1396
- tal results, polymers, relaxing media, Novikov (A.G.), Zelenev (Yu.V.), 1401
- contact problems, friction, half space, punch problems, Graham (G.A.C.), Sneddon (I.N.), 1402
- beam columns, dynamic stability, Dost (S.), Glockner (P.G.), 1474 cracks, dynamic analysis, finite element techniques, j-integral, Kishimoto (K.), Aoki (S.), (et al.), 1565
- adhesives, creep, rheology, testing equipment, torsion (viscoelastic), Kenner (V.H.), Knauss (W.G.), (et al.), 1607
- experimental results, tendons, tissues, Woo (S.L.-Y.), Gomez (M.A.), (et al.), 21.63
- collagen, constitutive relations, tissues, Sanjeevi (R.), 2149

- dissipation, tides, Venardale (W.E.), 2317
 constitutive equations, nonlinear materials, Krogers (A.F.), 2422
 crack growth, dugdale model, earthquake effects, rupture, Yamashita (T.),

- structural optimization, vibration (forced), Lekszycki (T.), Othoff (N.), 2636 plates (thick), thermal diffusion, Cukic (R.), Kuzmanovic (D.), 3078 rods, thermal stresses, thermoelasticity (transient), Misra (J.C.), Achari (R.M.),

- thermoviscoelasticity, yarn, Buckley (C.P.), 3094 composite structures, cyclic loading, thermal fatigue, Viktorova (I.V.), 3098 diffusion, initial value problems, mathematical methods, Groger (K.), Hunlich (R.). 3117
- bones, experimental results, materials properties, torsion, Fraeca (P.), Harper (R.), (et al.), 3333
- constitutive equations, elasticity (nonlinear), muscles, Mizrahi (J.), Karni (Z.),
- wascular system, heart, muscles, ventricular diastole, Moskowitz (S.E.),
- finite element techniques, isoparametric elements, Zeid (I.), Padovan (J.), 3394 propagation, waves, Meinardi (F.) ed., 3569, book faults, half space, layered media, strain, Iwasaki (T.), Matsuura (M.), 3552 creep, pipes, torsion, Lau (J.H.), Lau (T.T.), 3726 creep, shells (cylindrical), torsion, Lau (J.H.), 3727 creep, shells (cylindrical), torsion, Lau (J.H.), 3727

- creep, shells (cylindrical), torsion, Lau (J.H.), 3727
 cardiovascular system, heart, stress analysis, Moskowitz (S.E.), 4300
 acceleration waves, conserts solids, propagation, Grioli (A.C.), 4416
 constitutive equations, singular integral equations, Bloichik (V.S.), Ryabov
- eams, elastic foundations, Sonoda (K.), Kobayashi (H.), 4647 omposite materials, crack growth, cracks, fatigue, Kaminskii (A.A.), Gorelik
- nes, composite materials, constitutive equations, microstructures, Gottes-man (T.), Hashin (Z.), 5299
- ceramics, creep, nuclear fuels, Laveikin (L.I.), Malygin (V.B.), (et al.), 5571 contact problems, cylindrical bodies, indentation, rolling contact, Bapet (C.), Batra (R.C.), 5575
- beams (composite), bending, plastics, Afanasenko (N.N.), Ekskhik (V.S.), (et al.), 5559
- boundary value problems, cauchy problem, thermoviscoelasticity, Umanskii (S.E.), 6126 uake engineering, soil structure interaction, Harada (T.), Kubo (K.), (et
- mping, plates, vibration, vibration (viscoelastic), Dubasov (V.D.), Machevariani (M.M.), (et al.), 6364
- beams, dyna nic response, plates, vibration, Marangoni (R.D.), Basavanhally

- half space, moving loads, punch problems, Golden (J.M.), 6528 fracture criteria, plates, Kaminskii (A.A.), 6687 blood, cell behavior, membranes, Secomb (T.W.), Skalek (R.), 6797

- experimental mechanics, flow measurement, materials properties, rheology, viscometry, Gottlieb (M.), Macosko (C.W.), 6803
 shells (cylindrical), structural optimization, thermoelasticity, Shabiii (O.N.),
- Zaretskii (V.1.), 7062
- arteries, blood flow, flexible walls, Smit (C.H.), 7164
 arteries, blood flow, dynamic viscoelasticity, shells (cylindrical), Misra (J.C.), Chakravarty (S.), 7166
- ental mechanics, polymers, process control, Briedis (I.P.), Savalev (A.M.), (et al.), 7386
- collagen, fibers, stress strain relationships, tissues, Sanieevi (R.), Somanathan (N.), (et al.), 8004
- beams (timoshenko), impact, models, Endo (M.), Takatsuka (A.), 8126
- cyclic loading, excitation, nonlinear materials, polymers, Kameukhov (V.G.), enchenkov (I.K.), 8266
- creep, nonlinear materials, polymers, Goldman (A.Ya.), Tsygankov (S.A.), 8267 contact problems, layered media, shells (cylindrical), thermal effects, Pre-obrazhenskii (I.N.), Rachek (I.Yu.), (et al.), 8275
- existence theorems, hyperbolic equations, materials possessing memory, poi-scuille flow, Hattor (H.), 8542 nonlinear materials, shock, Donato (A.), Vermiglio (G.), 9049 coatings, diffusion coatings, relaxing media, stress strain relationships, Pav-
- lina (V.S.), Matychak (Ya.S.), 9206
- rubber, shock absorbers, vibration isolation, Hausler (K.), 9210
- composite materials, dynamic stresses, fibers, stress rupture, Moskvitin (V.V.),
- beam columns, creep buckling, structural stability, Arutiunian (N.Kh.), Kolmanovskii (V.B.), 9290
- creep rupture, fracture, fracture criteria, griffith cracks, high temperature. Mccartney (L.N.), 9365
- composite materials, propagation, waves, Mccarthy (M.F.), 10048 brittle materials, damage, deformation, mass flow, micromechanics, rocks, Epifanov (V.P.), Faustov (M.A.), 10300
- ams, buckling, differential equations (ordinary), population dynamics, residual stresses, surveys, Gurtin (M.E.), 10894
- oles, inhomogeneities, pade approximation, waves, Barclay (D.W.), Moodie (T.B.), (et al.), 11063
- impact, shelis (spherical), Senitskii (Yu.E.), 11074 asymptotic behavior, nonlinear materials, phase changes, Andrews (G.), Ball (J.M.), 11218
- dynamic response, half space, layered media, soil mechanics, Fillerup (J.M.),
- viscoelastic waves, rods, thermoviscoelasticity, waves, Cohen (H.), Tallin (A.G.),
- propagation, shells (fluid-filled), tubes, waves, Moodie (T.B.), Haddow (J.B.), (et al.), 123
- propagation, rods, semi infinite media, viscoelastic materials, waves, Singh (G.), Singh (A.), 124

- blood flow, pipe flow, pulsatile flow, response, Rieutord (E.), 7286
 convection, viscoelastic fluids, Hamabata (H.), Namikawa (T.), 7906
 viscoelasticity, constitutive equations, film flow, strain rate, tensor methods, Waxman (A.M.), 3
- beams, dynamic properties, impedance, vibration (forced), Ziolkowski (W.), Sliwinski (A.), 64
- lex variables, constitutive equations, frequency domain techniques, Booij (H.C.), Thoone (G.P.J.M.), 289
- roximation methods, nonlinear materials, Netrobko (V.P.). Luchnikov (M.A.). 291

- (M.A.), 297
 constitutive equations, damping, frequency response, nomograms, thermal effects, Jones (D.I.G.), 297
 beams (timoshenko), elastic foundations, Rozenbejgier (Z.), 3:4
 constitutive equations, nonlinear materials, thermodynamics (nonequilibrium), Balke (H.), Bergander (H.), 7095
 numerical analysis, propagation, soils, vibration, Girardi (L.), 1256
 extrapolation, integration, nonlinear methods, numerical methods, oscillations (Sid A.) 2784 tions, Sidi (A.), 2184
- creep, deformation, polymers, thermal effects, Stepanov (V.A.), Bershtein (V.A.), (et al.), 2426
- (V.A.), (et al.), 2426 bending, crack coalescence, crack opening displacement, griffith cracks, stress intensity factor, Graham (G.A.C.), 2567 adhesives, crack opening displacement, crack propagation, fracture, Bitner (J.L.), Rushford (J.L.), (et al.), 2569 complex variables, plates (simply supported), thermal loading, Das (S.), 3083 creep, relaxing media, stress strain relationships, Kecs (W.), 3725 nonlinear systems, random loading, stochastic systems, structural stability, Pattern (J.D.), 2709

- Potapov (V.D.), 3799
- creep, strain, thermal loading, Gokhfeld (D.A.), Madudin (V.N.), (et al.), 4209 casting, creep, shells, solidification, steel, stress analysis, Tien (R.H.), Richmond (O.), 4211
- constitutive equations, creep, nonlinear materials, Partl (M.), Tinic (C.), (et al.),
- constitutive equations, creep, work hardening, Murakami (S.), Ohno (N.), 4576 composite materials, deformation, laminates, Pobedrya (B.E.), Kholmatov (T.),

- shells (of revolution), shells (orthotropic), thermal stresses, Durgaryan (S.M.), latyan (A.P.), 4683

- bones, mechanical properties, moisture, Meinis (A.E.), Knets (I.V.), 5296 dynamic analysis, mathematical methods, rods, rotating bodies, Vike (V.G.), Usatikov (S.V.), 5359
- contact problems, variational methods, Zaitsev (E.A.) Kravchuk (A.S.), 5576 constitutive equations, ice mechanics, Spring (U.), Mortand (L.W.), 5577 constitutive equations, functional analyis, internal state variables, Bertram
- ts, finite element techniques, laplace transform, Kusama (T.), boundary ele Mitsui (Y.), 6319
- aging, expansion, spherical bodies, Arutiunian (N.Kh.), Shoyhet (B.A.), 6540 dilute solutions, micromechanics, networks, non newtonian flow, polymers, Soong (D.), Shen (M.), 6801
- constitutive equations, nonlinear materials, rods, waves, Fusco (D.), 7171 beams, dynamic loads, finite element techniques, impulsive loading, Griffin
- (P.D.), Martin (J.B.), 7231
- composite materials, polymers, reinforced bodies, Lipatov (Yu.S.), 7403 copper, damping, dynamic properties, fourier transform, strain gages, waves, Sogabe (Y.), Kishida (K.), (et al.), 7563
- deformation (finite), shear loading, stress analysis, Dixit (P.), Joseph (D.D.),
- constitutive equations, dissipation, vibration (viscoelastic), Senchenkov (I.K.),
- adhesives, bonded joints, constitutive equations, failure, Brinson (H.F.), 8277
 bars, composite structures, torsion, Allam (M.N.M.), Ghaleb (A.F.), 8309
 adhesives, bonded joints, brittle fracture, electron microscopy, flaws, Sancak-
- tar (E.), Padgiwar (S.), 2637 mping, mechanical analysis, structural response, vibration (forced), Luzzato (E.), Jean (M.), 2960
 - constitutive equations, viscoelasticity (dynamic), Pochyty (F.), 9198

- constitutive equations, facing memory, Saut (J.C.), Joseph (D.D.), 2000
 adhesives, bonded joints, thermal effects, Delale (F.), Erdogan (F.), 9497
 adhesives, bonded joints, laplace transform, Delale (F.), Erdogan (F.), 9498
 elastic foundations, highways, moving loads, plates, Bandyopediyay (S.S.),

- ruzza cyclic loading, fracture, rubber, Dwda (V.l.), 10314 mass transfer, non newtonian suspensions, particle fluid flow, reynolds num-ber (small), Kawase (Y.), Mashelkar (R.A.), fat al.), 10497 bodies (liquid filled), end effects, one dimensional flow, oscillations, pressure change, tubes, waves, Amerizade (R.Yu.), Nasabov (V.G.), 17105 constitutive equations, nonlinear materials, polymers, relaxing media, Stale-
- vich (A.M.), 11217

 elastic bodies, infinite medium, moving loads, Watanabe (K.), 1257
 elastoplasticity, mathematical methods, propagation, unloading, Chernov
 (A.V.), 1261 (A.V.), 1261
- anisotropic media, elastic waves, half space, Musgrave (M.J.P.), Payton (R.G.),
- composite materials, layered media, orthotropic materials, propagation, Yasser (S.), 1264 mada (M.), Nemat-Na
- composite materials, layered media, models, propagation, Murakami (H.), Shioya (S.), 1265
- elastic bodies, impact, plates, punch problems, Moodie (T.B.), Tait (R.J.), (et al.), 1267
- piles, vibration (flow induced), vortex shedding, Zedan (M.F.), Yeung (J.Y.), (et al.), 1316
- cylindrical bodies, oscillatory flow, vortex shedding, Verley (R.L.P.), 1317
- beaches, breakers, nonlinear theory, shallow water, Kirkgoz (M.S.), 1707 compressible flow, orifices, shock tubes, itch (S.), Kitamura (A.), (et al.), 1937

- clastic bodies, micropolar media, propagation, Dost (S.), 2308 beams, dispersion, shock, Gamby (D.), Lamy (R.), 2310 elastic waves, scattering, shells (ellipsoidal), Simon (M.M.), Radinski (R.P.),

- cracks, diffraction, stresses, Wickham (G.R.), 2313 elastic bodies, elasticity (nonlinear), nonlinear materials, propagation, theory, Gurvich (E.L.), Lura (A.I.), 2316 composite materials, ultrasonics, velocity measurement, Lynnworth (L.C.), Ree
- (W.R.), (et al.), 2318

- (W.R.), (et al.), 2378
 half space, scattering, theory, Biagoveshchenskii (A.S.), Voevodskii (K.E.), 2320
 columns, density, sand, Cowin (S.C.), Comfort (W.J.) III, 2327
 atmosphere, coriolis forces, hydrodynamic stability, Grotjahn (R.), 2327
 decay, plasma, stability theory, vlasov equation, Shivamogo (B.K.), 2960
 plasma, propagation, relativity, theory, Grank (A.), 2370
 isentropic processes, magneto fluid dynamics, standing waves, theory, Patagon (N.F.), 2977
 hreakers, hydrofoils, surface profiles, towed body dynamics, Duncen (J.H.)
- breakers, hydrofoils, surface profiles, towed body dynamics, Duncan (J.H.),
- 2940
 mathematical methods, nonlinear waves, parabolic equations, stability (numerical), Hagan (P.S.), 3419
 anisotropic media, cracks, elastic bodies, Crampin (S.), 3541
 elastoplasticity, impact, rods, Kotlyarovskii (V.A.), 3543
 cavities, cylindrical bodies, elastic waves, propagation, Rubtsov (Yu.K.), 3544
 propagation, viscoelastic materials, Mainardi (F.) ed., 3549, book
 buckling, composite materials, elastic bodies, Tokuoka (T.), 3563
 compressional waves, unsteady flow, Zahorski (S.), 3657
 dvnamic interaction, ocean, vibratios (flow induced), vortex shedding, Nord-

- compressional waves, unsteady flow, Zahorski (S.), 300/ dynamic interaction, ocean, vibration (flow induced), vortex shedding, Nordgren (R.P.), 3594
- gren (R.P.), 5094
 heat transfer, mass transfer, thermal diffusion, thermodynamics, thermodynamics (Irreversible), Sienkutycz (S.), 4143
 experimental methods, porous media, saturation, streams, Chandler (R.), 4239
 channel flow, free boundary, infiltration, Sherman (B.), 4257
 bars, models, propagation, stresses, Reeves (W.R.), Greenspen (D.), 4406
 bars, propagation, stresses, Nagaya (K.), 4407
 asymptotic methods, bars, piezoelectric devices, propagation, Paul (H.S.),

- Raju (D.P.), 4408
- layered media, spherical bodies, unsteady state, vibration, Gorshkov (A.G.), Tarlakovskii (D.V.), 4413
- elastic waves, (riction, half space, interfaces, Comoinou (M.), Barber (J.R.), (et al 1 4419

- energy methods, lamb problem, Meleshko (V.V.), 4419
 inhomogeneities, propagation, slabs, Heading (J.), 4420
 diffraction, fracture, interface cracks, layered media, wave interactions, Rosamanith (H.P.), Fourney (W.L.), 4421 enuation, composite materials, dispersion, variational methods, Tabot
- (D.R.S.), Willis (J.R.), 4422

- cracks, elastic bodies, stress intensity factor, transient, Itou (S.), 4428 surveys, water, Chaudhuri (K.), 4439 compressible flow, numerical methods, propagation, two dimensional waves, Parkor (R.), James (M.N.), 4440
- kinetic theory, nonlinear waves, relaxing media, shock waves, Shyam (R.), Sharma (V.D.), (et al.), 4443
- oundary value problems, piezoelectric devices, propagation, resonance, Audi (B.A.). 4753
- cracks, impact, semi infinite media, shear, stress intensity factor, Brock (L.M.), 4672
- boundary integral methods, harbors, ocean, Rahman (M.), 4992 elastic bodies, impact, nonhomogeneous media, propagation, rods, Singh (M.C.), Frydrychowicz (W.), 5411 cylindrical bodies, oscillations, torsional waves, Ertepiner (A.), Gurkok (A.),
- 5412 te materials, layered media, propagation, Beaupre (G.), Herrmann (G.),
- composite materials, particles, propagation, resonance, Kinra (V.K.), Ker (E.),
- (et al.), 5424 boundary layer, mass flow, rotating fluids, Maeland (E.), 5436 floating bodies, plates, solid-fluid interaction, Bukatov (A.E.), Mordashev (V.I.), 5447
- cylindrical bodies, explosions, rocks, Pavlov (M.M.), 5894 beams, dispersion, hydroelasticity, inviscid fluid, Cook (L.P.), Holmes (M.),
- undary elements, propagation, two dimensional waves, wave equations, Mansur (W.J.), Brabbia (C.A.), 6320

- hyperbolic equations, nonlinear analysis, random media, sensitivity, stochastic systems, Adams (E.), Ames (W.F.), 6327 constraints, clastic bodies, Whitworth (A.M.), 6387 clastic bodies, prestressed structures, semi infinite media, Chakraborty (S.K.), Dey (S.), 6382
- boreholes, cavities, dynamic stresses, liquids, Shvets (L.P.), 6393 edge effects, elastic bodies, propagation, Bestuzheva (N.P.), Durova (V.N.),
- elastic bodies, nonlinear materials, shock waves, wave interactions, Pluchino

- crystals, polycrystalline materials, strain, theory, Keontev (K.L.), 6397 dissipation, phase velocity, theory, transient, Mainardi (F.), 6401 flexible walls, propagation, tension, Bitbol (M.), Pole (G.), 6427 breakwater, gravity waves (breaking), Hamer (D.G.), Hamer (F.C.), 6520

- eric circulation, forecasting, meteorology, weather forecasting, Arai (Y.) 7116
- utive equations, nonlinear materials, rods, viscoelasticity, Fusco (D.).
- bars, hopkinson bar, propagation, Follansbee (P.S.), Frantz (C.), 7273 copper, damping, dynamic properties, fourier transform, strain gages, viscoelasticity, Sogabe (Y.), Kishida (K.), (et al.), 7863 fluid power, hydraulic machinery, positive displacement machines, transient effects, Mavrostai (K.L.), 7839 bottom irregularities, dredging, estuaries, sand, Baliga (B.R.), Hudapeth (R.T.),

- rotating fluids, turbulence, Hopfinger (E.J.), Browand (F.K.), (et al.), 7791 computing techniques, fast fourier transform, Willie (J.C.), 2058 cavities, half space, propagation, viscoplasticity, Tenimum (S.), 8120 solid solid interface, transmission, two body problem, Barber (J.R.), Comninou (M) (et al) 8121
- ic media, elastic bodies, propagation, Chakraborty (S.K.), De (R.K.), R124
- glaciers, ice, non newtonian flow, two dimensional waves, Fowler (A.C.), 8141 buoys, heaving, pressure, Tucker (M.J.), 8159 characteristic methods, networks, routing, sewerage, unsteady flow, Sevuk
- (A.S.), Yen (B.C.), 8550
- otic methods, boundary layer, hydrodynamic stability, Gaster (M.),
- magneto plasma dynamics, propagation, radiation properties, theory, Shyam (R.), Sharma (V.D.), 8649
- mular flow, eddy viscosity, film flow, liquid vapor interface, turbulent flow, two component flow, two phase flow, Suzuki (K.), Hagiwara (Y.), (et al.). 8722

- mail: 0022 materials, rods, vibration, Miloserdova (I.V.), Potapov (A.I.), 9038 dielectrics, reflection, refraction, Majorkowska-Knap (K.), 9044 cavities, half space, propagation, Tenimura (S.), 9048 blast waves, compressible flow, finite amplitude, impact, shock waves, Lee (TS) 9082
- (D.S.). Kips (M.E.). (et al.). 9083
- power generation, rarefaction waves, rupture, steam power plants, tubes, Squarer (D.), Manhardt (A.E.), 9084 mobility, shells (cylindrical), shells (fluid-filled), vibration, Fuller (C.R.), 9098

- controllability, distributed parameters, Lagrese (J.), 9145 convection (benard), numerical methods, rayleigh number, Cross (M.C.), Hohenberg (P.C.), (et al.), 9538
- conservation laws, hyperbolic equations, thermoelasticity (nonlinear). Kondaurov (V.I.), 9796
- kelvin waves, planetary atmospheres, rossby waves, Covey (C.), Schubert (G.),
- atmosphere, meteorology (physical), spectra, Kadyshnikov (V.M.1, 9677 composite materials, propagation, viscoelastic materials, Mccarthy (M.F.), 10048
- gravity waves (surface), optimal control, Noga (Yu.V.), 10066 dynamic stresses, liquid solid interface, pipelines, probabilistic design, sub-merged bodies, Lambrakoa (K.F.), 10066
- necigeu bouses, cambracos (n. 7.), robos free boundary, integro differential equations, potential flow, surface tension, unsteady flow, Koller (J.B.), Mikais (M.J.), 1048/ acceleration waves, continuum mechanics, singularities, Cohen (H.), Wang (C.-
- C.), 10895
- beams, computing techniques, Popov (M.M.), 11054 collision models, plates, Utkin (A.V.), Dremin (A.N.), (et al.), 11058 green function, half space, Brock (L.M.), 11060

- opagation, rods, viscoplastic waves, Bodner (S.R.), Aboudi (J.), 11062 iles, inhomogeneities, pade approximation, viscoelastic materials, Barclay (D.W.), Moodie (T.B.), (et al.), 11063
- erface phenomena, layered media, phase velocity, propagation, ultrason-ics, Pāarski (A.), 11064 iterface ph
- concrete, elastic behavior, ultrasonics, Gaian (A.), 11065 layered media, orthotropic materials, propagation, Ali (A.M.), Gulyaev (V.I.),
- asymptotic behavior, conical flow, diffraction, singularities, Cheeger (J.), Taylor (M.), 11091
- bodies (liquid filled), end effects, one dimensional flow, oscillations, pressure
- boules (uquia mieu), ena errects, one amensional now, oscituations, presure change, tubes, viscoclasticity, Amenzade (R.Yu.), Masibov (V.G.), 17106 crack growth, displacement gages, interferometry, plates, tension, Sukore (A.A.), Sharpe (W.N.) Jr., 17438 swirl flow, thermal effects, vortex tubes, Kurosaka (M.), 11574
- atmosphere, heat transfer (atmospheric), meteorology (physical), standing waves, Huang (R.-H.), Gambo (K.), 11912
 wavy walls, coils, ducis (curved), pressure drop, Shimizu (Y.), Sugino (K.), (et
- al.), 1760
- experimental results, hydrodynamic stability, Nakagawa (T.), Takagi (F.), 2807 buoyancy, friction (skin), heat transfer, laminar flow, plates (vertical), pres-sure drop, viscous effects, Rao (C.N.B.), Sastri (K.S.), 4163
- duct flow, particle fluid flow, roughness, unsteady flow, Verma (P.D.), Sarangi (K.C.), 6893

- irrotational flow, potential flow, transonic flow, Bollmann (G.), 8575 boundary layer, fourier series, laminar flow, viscous flow, Caponi (E.A.), Formatter berg (B.), (et al.), 11512
- tutive equations, film flow, strain rate, tensor methods, Waxman (A.M.), consti elasticity, 3
- Wayner (P.C.) Jr., adsorption, capillary flow, condensation, nucleation, phase

- Weyner (P.C.) Jr., adsorption, capillary flow, condensation, nucleation, phase changes, 9746
 wear, alloys, fretting, high temperature, Weterhouse (R.B.), 440
 asbestos, brakes, friction, friction drives, testing equipment, Zhowev (E.V.), Chichinadza (A.V.), 566, book
 experimental methods, friction, polymers, testing equipment, tribology, viscoelasticity (dynamic), Bartanev (G.M.), Lavrentev (V.V.), 570, book
 additives, contact stresses, gears, lubrication (boundary), oil films, scoring, viscosity, Neruse (C.), Hakuka (S.), (et al.), 346
 contact resistance, electrical conductivity, friction (sliding), sliding, Rabinovice (E. 1 1605
- contact resistance wicz (E.), 1666

AMR SUBJECT HEADINGS

FOUNDATIONS AND BASIC METHODS IN MECHANICS

Continuum mechanics Finite element methods Finite difference methods Other methods in computational mechanics Modeling Experimental system analysis

DYNAMICS AND VIBRATION

Kinematics & dynamics Vibrations of solids (basic) Vibrations (structural elements) Vibrations (structures) Wave motions in solids Impact on solids Wave motion in incompressible fluids Wave motion in compressible fluids Solid-fluid interaction Astronautics (celestial & orbital mechanics) **Explosions & ballistics** Acoustics

AUTOMATIC CONTROL

Systems theory & design Optimal control systems Systems & control (applications) Robotics

MECHANICS OF SOLIDS

Elasticity Viscoelasticity Plasticity & viscoplasticity Composite material mechanics Cables, ropes, beams, etc. Plates, shells, & membranes Structural stability (buckling, postbuckling) Electromagneto solid mechanics Soil mechanics (basic) Soil mechanics (applied) Rock mechanics Material processing Fracture processes Fracture mechanics Experimental stress analysis Material test techniques Structures (basic) Structures (ground) Structures (ocean & coastal) Structures (mobile) Structures (containment) Friction & wear Machine elements Machine design

Fastening & joining

MECHANICS OF FLUIDS

Rheology **Hydraulics** Incompressible flow Compressible flow Rarefied flow Multiphase flows Wall layers (including boundary layers) Internal flow (pipe, channel, Couette) Internal flow (inlets, nozzles, diffusers, & cascades) Free shear layers (mixing layers, jets, wakes, cavities, & plumes) Flow stability Turbulence Electromagneto fluid & plasma dynamics Naval mechanics Aerodynamics Machinery fluid dynamics Lubrication Flow measurements & visualization

THERMAL SCIENCES

Thermodynamics Heat transfer (one phase convection) Heat transfer (two phase convection) Heat transfer (conduction) Heat transfer (radiation & combined modes) Heat transfer (devices & systems) Thermomechanics of solids Mass transfer (with and without heat transfer) Combustion Prime movers & propulsion devices (systems & applications)

EARTH SCIENCES

Micromeritics Porous media Geomechanics Earthquake mechanics Hydrology, oceanography, & meteorology

ENERGY SYSTEMS AND ENVIRONMENT

Fossil fuels Nuclear systems Geothermal systems Solar systems Wind energy systems Ocean energy systems Energy distribution & storage systems Environmental fluid mechanics Mechanics of hazardous waste containment & disposal

BIOSCIENCES

Biomechanics Human factors engineering Rehabilitation engineering Sports mechanics

PUBLICATIONS SCANNED FOR AMR

AMR covers in its field technical journals, reports, books, symposia and annuals. The list of

publications includes all serials received regularly.

Titles are listed alphabetically in the form in which they appear on the journal. All articles and prepositions have been included except for those which begin a title. The list does not contain any cross-references. The origin of the publication is listed following the title of the publication unless the title indicates the city and/or country of publication. Where the city does not appear as a part of the title, then the city is shown, followed by the name of the country if the city is not well-known.

Abhandlungen der Braunschweigischen Wissenschaftlichen Gesellshaft. Braunschweig, Germany

Academie Royale de Belgique, Bulletin de la Classe des Sciences, 5e Serie. Brussels

Academie Serbe des Sciences et des Arts, Bulletin, Classe des Sciences Techniques. Belgrade

Acoustics Letters. London

Acta Academiae Aboensis, Ser. B. Mathematica et Physica. Abo.

Acta Astronautica. Oxford, United Kingdom

Acta Geophysica Sinica. Peking

Acta Mathematica. Budapest

Acta Mathematica Sinica. Peking

Acta Mechanica. Vienna

Acta Mechanica Solida Sinica. Peking

Acta Metallurgica. Oxford, United Kingdom

Acta Physica. Budapest

Acta Polymerica. Berlin

Acta Polytechnica Scandinavica, Applied Physics Series, Ph. Stockholm

Acta Polytechnica Scandinavica, Civil Engineering and Building Construction Series, Ci. Helsinki

Acta Polytechnica Scandinavica, Mathematics and Computing Machinery Series, Ma. Helsinki

Acta Polytechnica Scandinavica, Mechanical Engineering Series, Me. Helinski

Acta Technica. Budapest

Acta Technica CSAV. Prague

Acustica. Stuttgart

Advances in Applied Mechanics. New York

Advances in Biological and Medical Physics. New York

Advances in Biomedical Engineering and Medical Physics. New York

Advances in Cryogenic Engineering. Pittsburgh

Advances in Heat Transfer. New York Advances in Hydroscience. New York

Advances in Physics. London

Advances in Plasma Physics. New York

Advances in the Astronautical Sciences. San Diego, Calif.

Aeronautical Journal. London

Aeronautical Quarterly. London

Aeronautical Research Committee, SCIR, ARC Technical Note.

Bangalore, India

Aeronautical Research Laboratories, Australia, Aerodynamics Note, ARL/A. Melbourne

Aeronautical Research Laboratories, Australia, Aerodynamics Report, ARL/A. Melbourne

Aeronautical Research Laboratories, Australia, Instruments Note, ARL/I. Melbourne

Aeronautical Research Laboratories, Australia, Materials Report, ARL-MAT-Report. Melbourne

Aeronautical Research Laboratories, Australia, Mechanical Engineering Report, ARL-Mech-Eng-Report. Melbourne Aeronautical Research Laboratories, Australia, Metallurgy Note,

ARL/Met. Melbourne Aeronautical Research Laboratories, Australia, Metallurgy Report, ARL/MET. Meibourne

Aeronautical Research Laboratories, Australia, Structures and Materials Note, ARL/S.M. Note. Melbourne

AMR REVIEWERS

The editors wish to express appreciation on behalf of themselves as well as all the readers of this journal to the following individuals who have graciously given their time and the benefit of their learning to evaluate articles for APPLIED MECHANICS REVIEWS.

The list contains the names of active reviewers as of 1983.
